Further to our recent conversation I have now completed this application. Greg Allen is of the view it neds to be on the PC application form but you suggested it should be a text application. So to cover both option I have completed it in both forms and they are attached.
I have just printed my name on the signature page on both, my computer abilities do not stretch to electronic signatures!. If you need an actual signed page I can do this, scan it in and then email it to you. Also attached are copies of the two quotes we have received.
